Full-Stack Developer with applied AI experience, building production web apps and evaluating frontier LLMs through prompt design, failure-mode analysis, and agent evaluation at Outlier (Scale AI) and DataAnnotation Tech. CGPA 8.4, with international academic exposure in London and New Jersey. Seeking full-time Full-Stack Developer roles with AI-adjacent scope.

Skills

Languages: Python, JavaScript, C, C++, Java, SQL

Web: React.js, Node.js, Express.js, REST APIs, JWT Authentication, HTML, CSS

Databases: MongoDB, PostgreSQL, MySQL

AI / ML: LLM Evaluation, Prompt Engineering, CNN, OpenCV, HuggingFace, GroqAI

Tools & Platforms: Git, MongoDB Atlas, Multer, ImageKit, Swagger UI, Flutter

Experience

Prompt Engineer & Evaluator (Freelance), Outlier · Scale AI (India MWF Program) 05/2026 – Present

- Designed and evaluated prompts for multimodal, and conversational LLM training, grading responses across leading AI models and authoring rubrics with failure-mode analysis to improve reasoning and tool-calling accuracy.
- Built golden trajectories for autonomous agents and refined prompts for time-anchoring, domain constraints, and deterministic outcomes across health, finance, and personal-management domains.

AI Model Evaluator (Freelance), DataAnnotation Tech 11/2025 - Present

- Evaluated agentic coding tools (Claude Code, Codex, Gemini CLI) by designing ambiguous and deep-research prompts against real codebases, assessing model reasoning, assumption-handling, and multi-step tool use.
- Evaluated and compared hundreds of outputs from multiple LLMs across factual accuracy, contextual relevance, instruction adherence, and tone; designed edge-case prompts to test reasoning and robustness under ambiguous or complex inputs.

Software Engineer Intern, Ulavi Technologies — Singapore 06/2024 – 08/2024

- Built a production WhatsApp travel-planning chatbot using **GroqAI** and **Node.js/Express** that replaced a fully manual itinerary workflow, cutting end-to-end trip generation time by ∼**35%** as measured by the operations team.
- Restructured async API request handling to reduce response latency, documented 12+ endpoints in Swagger UI, reducing onboarding time for new backend contributors and supporting a clean production deployment.

Projects

Role-Based Food Discovery Platform *React.js, Node.js, Express.js, MongoDB*

- Engineered a MERN video-sharing platform with role-based access control and JWT authentication; built a partner upload pipeline using **Multer** and **ImageKit** for CDN delivery, securing all protected REST API endpoints against unauthorized access.

BioTrace — AI-Powered Health Identity System *React.js, Node.js, Express.js, MongoDB*

- Architected a role-based health platform for Patients and Doctors/Hospitals with unique ID generation and OTP authentication with a patient dashboard with health metrics tracking, AI-powered recommendations, and appointment/ prescription management, plus a doctor portal for patient search and record access.

Facial Emotion Recognition *Python, OpenCV, CNN*

- Designed and trained a custom CNN on **FER-2013** (∼35K images) to classify 7 emotion categories; deployed a real-time inference pipeline via OpenCV webcam feed achieving **sub-80 ms per-frame prediction latency** on CPU.

MongoDB Gen AI Hackathon, NYC *MongoDB Atlas, HuggingFace,Nomic AI Python* 05/2024

,

- Built an AI-powered misinformation-detection tool that integrates with newsfeeds and social media to detect, summarize, and analyze news articles, helping users identify credible sources.
- Collaborated with Nomic AI and HuggingFace to deploy a hybrid AI architecture using transformers and vector embeddings for content analysis.
- Optimized the backend with MongoDB Atlas Vector Search, accelerating large-scale query performance for real-time credibility scoring.

Education

Amity University, Noida, Uttar Pradesh 2021 – 2025
B.Tech Computer Science and Engineering (3 Continent Program) **CGPA 8.4**
Exchange Semesters: Birkbeck University, London, UK (01–03/2024)
Fairleigh Dickinson University, New Jersey, US (03–06/2024)

G.D. Goenka Public School, East Delhi — PCM + CS **Class X: 86% | Class XII: 89%** 2019 – 2021

Certifications

- **Flutter & Dart Fundamentals** — built 5+ cross-platform apps covering state management, navigation, and REST API integration.
- **Introduction to Sub Agents** — Anthropic: applied understanding of agentic architectures, tool-use chaining, and multi-step reasoning in autonomous LLM systems.

Leadership & Involvement

Core Team Member, Data Science Club — Amity University 06/2022 – 2025
- Co-organized **10+ workshops and guest lectures** on ML/AI reaching ∼200 students per semester; sustained active club membership growth across 3 consecutive years.

Class Representative, Amity University 2023 – 2025
- Primary liaison between faculty and a cohort of 30+ students on academic and operational matters.
